

*Ya... we know.*

No one likes to take the poop test, but  
*it can save your life.*

***It's really  
important that  
you complete your  
FOBT kit.***

**Consider this a gentle reminder  
to use the tools you were given  
when you received your Flu shot.**

If you've completed your test recently, *Congratulations!*  
You've done your part to prevent colorectal cancer.

***But if you haven't completed the kit.....***

*We know it's icky.*

But it only takes a few minutes every 2 years  
to give you peace of mind knowing you're doing  
your part to prevent colorectal cancer.

***If you need another reason....***

**When caught early, there is a 90% chance  
that colorectal cancer will be cured.**
